

Oefening

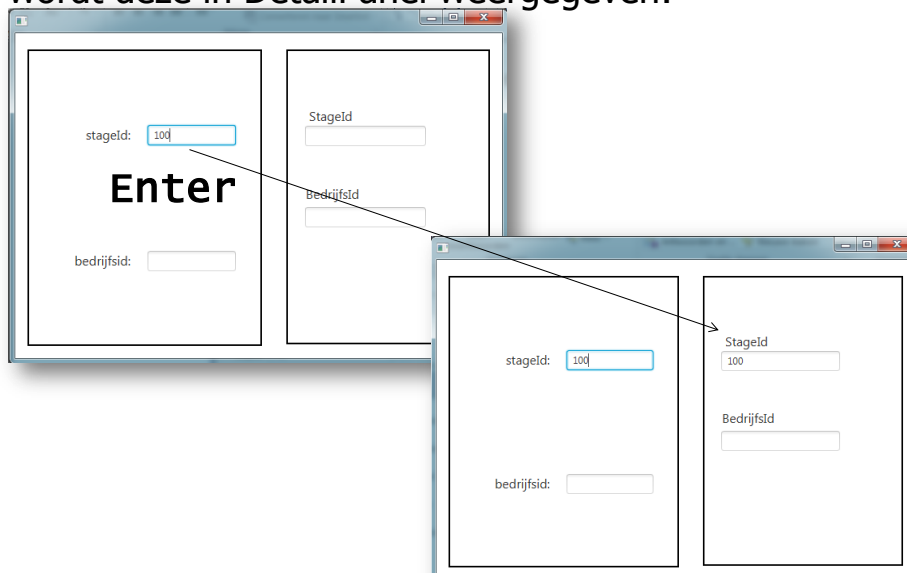

Een frame bestaat uit twee panels:

The image shows a window with two panels. The left panel has two input fields: 'stageId:' and 'bedrijfsid:'. The right panel has two input fields: 'StageId' and 'BedrijfsId'.

Oefening

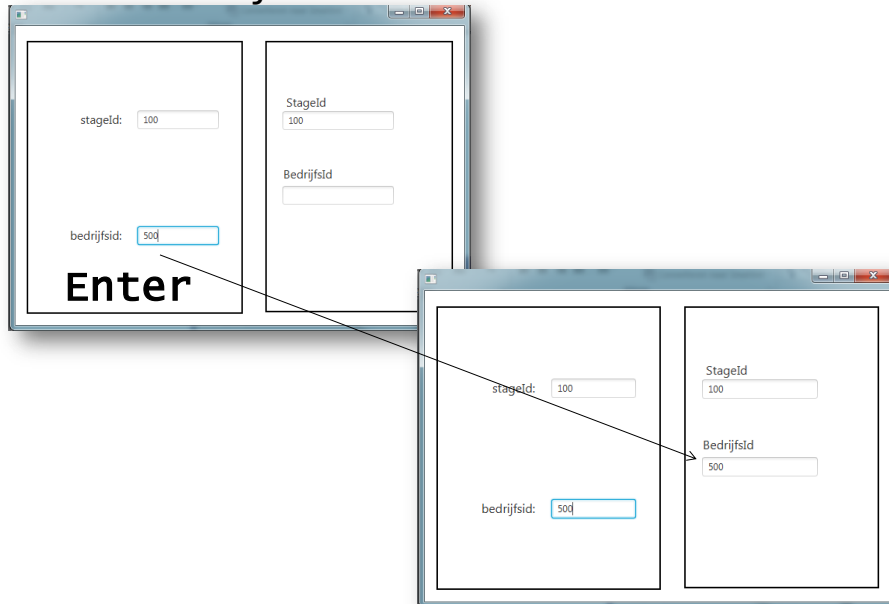

Indien we een stageId in FormPanel ingeven, dan wordt deze in DetailPanel weergegeven:

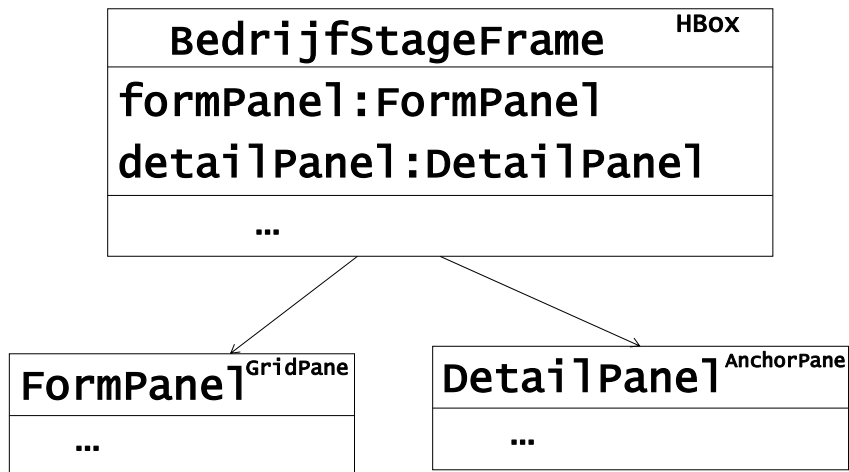

The image illustrates the data flow between two panels. The top-left window shows the 'stageId' input field with the value '100' and a large 'Enter' text. An arrow points from this input field to the 'StageId' input field in the bottom-right window, which now displays the value '100'.

Oefening

Idem voor bedrijfsid:

package gui:

FormPanel en DetailPanel zijn twee losstaande panels
