#### JDK8 downloaden.

https://www.oracle.com/technetwork/java/javase/downloads/jdk8-downloads-2133151.html **JDK10** downloaden.

http://www.oracle.com/technetwork/java/javase/downloads/jdk10-downloads-4416644.html

#### **Netbeans:**

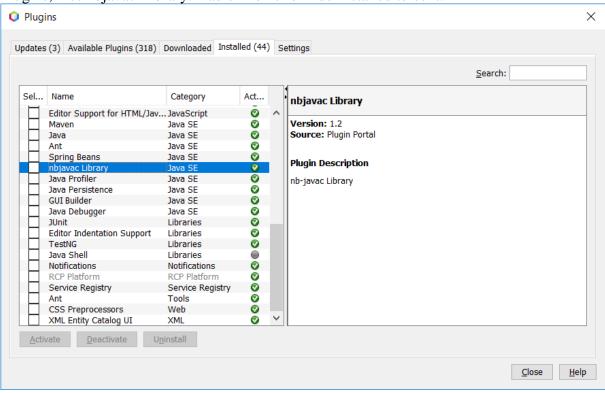

Apache NetBeans IDE Dev (Build incubator-netbeans-release-302-on-20180517)

https://www.apache.org/dyn/closer.cgi/incubator/netbeans/incubating-netbeans-java/incubating-9.0/incubating-netbeans-java-9.0-bin.zip

## downloaden en unzippen.

In mapje netbeans naar bin gaan en daar netbeans64 opstarten. Normaal vraagt hij om nbjavac Library toe te voegen. Indien niet, dan later handmatig toevoegen.

Eventueel achteraf handmatig nbjavac Library plugin toevoegen: naar Available Plugins, kies nbjavac Library. Nadien komt ze in de Installed terecht:

Naar de link <a href="https://github.com/carljmosca/netbeans-macos-bundle">https://github.com/carljmosca/netbeans-macos-bundle</a> gaan en de repository downloaden. Hierna in de terminal naar de map navigeren en het install.sh script runnen d.m.v het commando ./install.sh

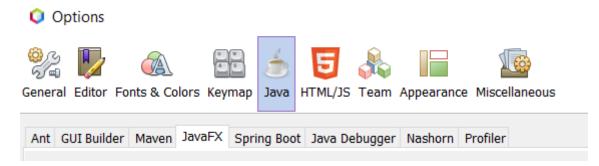

## Scene Builder for Java 10 10.0.0

https://gluonhq.com/products/scene-builder/

### Kies

In Netbeans integreren. Naar Tools → Options →

Scene Builder Home: navigeer naar map SceneBuilder

# Visual Paradigm 15.1

https://www.visual-paradigm.com/download/

Product: Visual Paradigm Standard 15.1

Activation Code: 37925-NM5EF-G67PT-U5R97-HCGQ8

Expiry Date: 2019-03-02

Zie Slides "InstallatieVisualParadigm"

#### Mac:

Op onderstaande link kan je info terugvinden over hoe je de damaged file van visual paradigm kan openen op een mac.
